## Frontend/ FullStack (JS) Developer

---

### Frontend/ FullStack (JS) Developer

Employment: Full time, Part time

Work schedule: remote work, full day

---

Experience — 3 years 3 months

October 2017  
— present tens  
1 year 4 month

#### Digital Zone

Kazan, dz.ru

##### Frontend-developer

Frontend development:

- Adaptive layout, mobile first;
- PWA
- HTML5, Jade/Pug/Nunjucks;
- CSS3, Scss, Stylus, CSSinJS, Bootstrap 3,4, Media queries, БЭМ;
- JavaScript (ES6 +), TypeScript, Flow, jQuery, RequireJS, Vue.js (Vuex), AngularJS, Angular 2+, Reactjs (Redux), NgRx;
- NPM, Gulp, Webpack;
- GIT
- Docker

##### Projects:

1. Ulmart - marketplace project, was engaged in html letters, searched and fixed bugs;
2. RZD project, web application for internal document management company. The project on Angularjs 1.x. Engaged in the development of new functionality and support for existing code.
3. Project from BPC company, web portal for the Rosselhoz Bank. Create layouts from Zeplin and development of components on Vuejs and functionality on native js.
4. Project from BPC company, web application for Sberbank, user account with the ability to bind transport cards and receive cost statistics. Web application development using Vue CLI. In later projects, whenever possible, I try to adhere to the concept of TDD.

July 2018 —  
present tens  
8 month

#### Labado, ООО “Лабеду”

labado.ru, C2C, B2C, B2B

##### Frontend-developer, Co-founder

- Adaptive layout, mobile first;

- PWA
- HTML5, SCSS, Bootstrap 4, BEM
- JS (ES6+), Flow, Typescript, Vuejs, Nuxt.js, Adonis.js => Adonuxt.js

**What i do:**

Web development using Vuejs. Development of components for Figma layouts. From the difficulties I faced with the understanding of Vuejs, since this was my first project with this framework. Project on stack Vue, Adonis, Nuxt.

April 2018 —  
September  
2018 5 month

## Zooprofi

zooprofi.online, C2C, B2B, B2C

### Fullstack-developer

Veterinary Marketplace

**What i do:**

Development of 4 applications, 3 frontend and 1 backend. I got into the project at the development stage of two front-end applications. In the process of the team fell off the second developer, who was the lead. As a result, I had to take all the development on myself. One of the applications was rewritten, as the project architecture was changed in the process and I decided to rewrite the project. I was engaged in the development of nodejs backend and fixing bugs on parallel projects. As a result, in 3-4 months 4 applications were completed. A public website, 2 frontend for managers and executives, was linked online payment with Yandex Cash and written backend for financial functionality. The project is now in search of funding, the work has not been carried out since **September**.

December  
2018 —  
February 2018  
3 month

## EverySpeak

C2C, B2C

### Frontend-developer, Co-founder

**What i do:**

I was taken to a small team with the idea to develop an online school for learning English. More precisely, the online school, it was supposed to be later. At the beginning, the idea was to clean up the sphere of learning English. Practice English without departing from the "plate". Any user could talk to an expert \ nivativ English for payment per minute.

He was engaged in the development of a web user account, in the process he had to make a React Native application. Faced WebRTC and browser capabilities for on-line broadcasting of audio and video. Also, according to the screen broadcast capabilities, which should have made it possible to use something like an online whiteboard during communication.

The project did not arouse high interest from local investors, after some time the developers went over different projects.

July 2017 —  
August 2017

October 2015  
— March 2017  
1 year 6 month

## Freelance

[freelancehunt.com](http://freelancehunt.com), [freelancer.com](http://freelancer.com)

### Web разработчик

- HTML, CSS, PSD, SEO, Контекстная реклама, SMM

Bachelor

2018

## Kazan Federal University

Higher Mathematics and Information Technologies, Fundamental Informatics and Information Technologies

## Advanced training courses

---

2016/2017

### **Courses on administering Linux from ICL.**

KFU, ITIS Laboratory

## Additional Information

---

About me

Responsible approach to the work performed, self-organized, developing professionally. I know how to use isomorphic JS applications, I think that JS is the future, I follow WebAssembly, I want to go. Many and persistently read technical articles, documentation and literature. I take a great interest in microcomputers and write pet projects for them on Node.js. I like to help younger employees in those. questions and instruct them on the path of JS development. Also in my free time I take part in various startups in the role of Frontend / Fullstack Javascript developer. I have 1 German startup (Frontend developer) and 2 Russian startups (Frontend / Fullstack) on my account. I used to start projects on Angular 5 or 6, but in the last few months I've been a supporter of Vuejs. Since November 2018, most of the projects I write on Vue.

## Projects

---

**1. MobiCRM**, graduation project. Developed Frontend and Backend. Angular 5 was used as a frontend framework on the back i use Koa2 (Nodejs framework). The design of everything is mine; some ui components (Inputs, cards and other) were used from Angular Material. 2018.

**2. Labado.ru.** The project is a marketplace of services, in the first stage, the C2C platform. With the ability to create assignments, receive feedback and select artists. It also implies the moderation of created tasks, messaging, and so on. Project in search of funding. In the project, I do front-end development. 2018-2019

The screenshot shows the 'Профиль' (Profile) page on Labado.ru. The header includes the Labado logo and navigation links: 'СОЗДАТЬ ЗАДАНИЕ', 'ЗАДАЧИ', 'ИСПОЛНИТЕЛИ', and 'О СЕРВИСЕ'. The user's name 'Семён Святозаров' and a 3.4-star rating are visible. The profile is divided into three sections: '1. Личные данные' (Personal data), '2. Уведомления и подписки' (Notifications and subscriptions), and '3. Безопасность' (Security). The 'Личные данные' section includes fields for email, phone, date of birth, and gender. The 'Уведомления и подписки' section has checkboxes for user notifications, system notifications, service news, and task subscriptions. The 'Безопасность' section includes fields for current, new, and confirm passwords. A 'СОХРАНИТЬ' (Save) button is at the bottom.

**3. UDSGame.** Project to increase customer loyalty. International project. He worked in an office in Kazan, was developing a web admin. panels for cashiers, managers. Developed on Angular 2, 4. 2017
